This is Phil Arnott for community comment on K INS radio

I'm going to speak briefly about three different subjects but will in the future discussed the subjects in more detail.

The first subject is the bureaucracy in our federal government. Washington DC is in shambles. Congress does not know what it's doing and the White House is clamping down on our rights and privileges. What we need in our government today are some outsiders that are experienced in business, negotiations and closure.

The second subject that I will go into detail in a later comment is to talk about the men and women in our armed services. These men and women are stationed all over the world and are there to protect our interests and our safety. America would not be where it is today without the sacrifice of those men and women.

The third subject that I will discuss in more detail later on is about our local law enforcement personnel. I want to thank and praise ~~shate~~ of Downey and all of our local law enforcement people. While I am sure that at least some of you listeners have received a ticket for speeding, illegal parking or something of that nature. That's their job. Remember it was you who was in the wrong. These law enforcement people save lives every day of the week and for one I am extremely proud to support them in any way I can. After seeing the shooting of the police officer in Philadelphia while he was in his patrol car was so irresponsible that it made me ill. No it's not the gun that is the problem it is the person that I possesses that gun.

While I am not a veteran nor have I been involved in law enforcement but I have received the benefits of their work over the years. Recovery from a burglary, and assault from a stranger and a collision in my automobile that was not caused by me. These are all of the incidences where law-enforcement personnel came to my rescue and for that I thank them and for their hard work.

I am proud to say hello to our veterans and to thank them for their service and I am also very proud of our local law enforcement people. They sacrifice a lot.
