August, 2016

I am always grateful when I think back to our founding fathers when they created this great country of ours. It was government of the people by the people and for the people.

That is not the case today, it is government of the establishment by the establishment and for the establishment.

That does not include you and I but it does include Bill and Hillary Clinton.

I am gravely concerned about the direction of our country because of the direction of our government, which is the establishment.

I have tried to stay away from politics for over 15 years ^{on my cc} but the turmoil in the world and in this country has caused me to break that tradition and to speak sincerely on matters that concern me and should concern you.

~~For~~ ^{For} years I have supported a nonprofit group called ~~the~~ ^{the} judicial watch. It's Pres., Tom Fitton has done an outstanding job in reporting waste and corruption in our federal government. One of the early investigations was into Lois Lerner's investigation by a the Internal Revenue Service into conservative watchdog groups.

Other investigations, of course have included the recovery of Hillary Clinton's emails. Recently a US District Court has ruled that judicial watch can invoke legal discovery into those emails. This discovery may include the deposition of Hillary Clinton herself. The decision to allow judicial watch to proceed was made by Judge Emmet Sullivan, a US District Court judge.

In its early discovery of documents, judicial watch found out that the State Department ~~he~~ ^{Keep} did ~~key~~ ^{Keep} Clinton emails from them. Keep in mind that this is our government. Remember, government of the people by the people and for the people, not government for the establishment.

This recent information discovered by judicial watch ^{did} of establish is that had those emails been turned over by the State Department when requested, it would have been discovered that Hillary Clinton had a private email server in her home. ^{in 2014.}

Also reported by judicial watch is that under our current administration, there has been a remarkable drop in government corruption prosecutions

X judicial watch has been involved in a tax payers lawsuit to prevent the District of Columbia from illegally spending our tax dollars. Just recently the house of representatives filed a ~~supporting~~ ^{supporting} brief in support of the lawsuit filed by judicial watch. In its brief it stated that the District of Columbia's local budget act is a naked and unabashed effort to strip Congress of powers vested to it by article 1 of the Constitution, and to circumvent the one constitutionally appropriate way to proceed.

X Interestingly, the mayor of the District of Columbia, Muriel Bowser has sought to avoid the injunction that is currently in place that prevents the unlawful expenditure of taxpayers money by that government.

I leave you with a point to ponder: don't you think that each and every one of us, as taxpaying citizens of this great country of ours, should support nonprofit groups like judicial watch to help clean up the corruption in our federal government.
