I've said this before in my comments, but your Federal Senators and Congressmen are not who you want to contact about the "Devil's Slide" area just South of Crescent City on U.S. Highway 101. I wrote to Senators Boxer and Feinstein and Congressman Huffman about the situation, and the only answer I received was from Senator Boxer, telling me that U.S. 101, in spite of the U.S. notation in the route number, is a State of California Highway and the State is responsible for it's maintenance and rebuilding. So,. according to Senator Boxer, send all your requests to your State Legislators and the Governor. I would think the Times-Standard and the other local media, such as radio and television stations, would be aware of this point and make sure all PSA announcements are correct.//When I was working as a clerk in local grocery stores, we only kept a small amount of money in the cash tills, especially in the late evenings, or at night in 24 hour markets. That kept losses to a relatively small amount in case of a robbery. We were also instructed to give the perp the money and make mental observations, such as: did he (or she) have a visible weapon, or just an implied one? Height and approximate weight? Type of clothing? Caucasion, Native American Black, Hispanic, or other type of skin? Did you see which way they went? On foot or in a vehicle? I never got held up, but I think I was prepared, although one never knows what they will do in a situation untill it actually happens to them. In all the stores I worked at, the assistant manager or head clerk would routinely

clean out the tills and put the cash and checks through the slot in the safe lid.\*//I have had a 2001 Jeep since it was new, and it has been a good vehicle and mostly reliable, until the tranny went out a couple of years ago. We went through some problems getting it repaired , but we finally "got 'er done", and it has been a good vehicle since. Now, it looks like I may have to make some trips to the Bay Area, so we decided to get a newer one. We were going to make the rounds, starting at Lithia Dodge/Chrysler/ Jeep dealership just south of town. I asked Brian, the first salesman we came to if he had any cars to sell. He grinned and said yes, and after getting a description of what we were looking for, found us just what we wanted.\* We started on the paperwork and his Manager, Zak, came over and we continued the procedure. It was late in the afternoon that this all took place, but the paper transition went smoothly, and Brian and Zak were very thorough as they completed a deal complicated by some financial things we were going through just then.\* We were very pleased by the whole thing and they made all the used car salesman jokes inapplicable. \*So, if you are looking for a new or used vehicle, stop in at Lithia and ask for Brian or one of the other good sales reps.\* All I have to do now is figure out all the buttons and dials and what makes 'er go !
