(Thanks Kasi, please let me know you got this. We'll see if you work on weekends!)

(Audio attached at bottom)

This is Anthony Mantova for Community Comment.

The Presidential election presents America with two dramatically different paths. This is not just "more of the same," because from Bill Clinton to today, all the Democrat and Republican candidates for president have been part of a corrupt establishment. It's the Establishment that uses the law to enrich the selected view, who use Congress to protect crony capitalist corporations, those Multinational interests that benefit from finely-crafted laws which aim to keep out free-market forces. Besides being unfair, these laws artificially raise the cost we pay.

Mr. Trump promises to shake things up.

He does just fine defending himself. It's great seeing the media stumble repeatedly, unable to get their hooks into the record-breaking Republican candidate.

If you are undecided, or disgusted with the election so far, that's ok--maybe I can help. Because when in doubt, you should look at which candidate will cost you more money. And without a doubt, the more expensive candidate is Hillary Clinton.

According to the Americans for Tax Reform, Hillary Clinton costs more, to the tune of an additional 1 Trillion dollars in Net Tax Increases, and that is on top of the already unbearable situation we have now. Let's quickly go through what Hillary wants to do.

She wants to get 350 Billion dollars through a 28% cap on item deductions. That's not going to encourage rich developers that are currently holding onto their money--waiting for the economy to gain traction. If they can't protect their assets through these critical deductions, they are not going to commission any new projects.

-Hillary wants to raise the death tax, a thing that has no purpose in a civilized world.

-Accordinging to ATR, She wants to bring about something called the (quote) Fair Share Surcharge (unquote).

-She thinks the taxes on Capital Gains need to be higher.

Those of you listening to Dave Ramsey, putting your savings in 401ks and other retirement accounts? Well, Hillary wants some of that action, too! She wants a new tax on stock trading. It is likely that tax would affect you.

-Rush Limbaugh makes the point that corporations don't pay taxes. People do, and he is right. Corporations pass on the artificial cost of taxes to you, the consumer. Hillary thinks corporate taxes need to go up.

She also has a new tax in mind for corporation, calls it an "Exit Tax," and it's aimed at corporate income, earned overseas. You know, it's bad enough that foreign countries punish us for doing business in their markets, now the US government could make it even worse!

Hillary is extremely expensive, Trump wants to cut taxes. He understands that to get the economy moving, we need to let more people keep their hard earned money. That sounds like a better alternative to me.

Vote wisely--I'm Anthony Mantova, community comment
